Welcome to São Paulo!

We are very pleased to welcome all of you to the *XIX Annual Meeting of the Latin American and Caribbean Economic Association* (LACEA) and the *XXIX Annual Meeting of the Latin American Chapter of the Econometric Society* (LAMES). University of São Paulo is delighted to host the 2014 LACEA LAMES, and to have participants from all over the world in this unique joint meeting.

This year we have a very exciting program. More than 400 contributed papers are distributed at 125 sessions covering all areas of economics. Our special greetings to the Scientific Committee, who kindly evaluated almost 900 submissions in a timely manner. Also 42 invited sessions will be presented by some of the most important academics and policy makers in economic field of present times.

Our plenary lectures will be held by Aloísio Araújo (IMPA), Kaushik Basu (World Bank), Oliver Hart (Harvard), Carmen Reinhart (Harvard), Manuel Arellano (CEMFI), Robert Townsend (MIT), Guido Imbens (Stanford), Ariel Pakes (Harvard), Tim Besley (LSE) and finally Michael Woodford (Columbia).

Organizing a meeting on such a large scale required a lot of work, and this would not be possible without the commitment of all involved. We’d like to first thank our sponsors, who generously provided the necessary financial support. We are also grateful to LACEA and LAMES Secretariats who helped us put the Conference together. Finally, we’d like to specially thank the administrative staff and the student volunteers of the School of Economics, Business and Accounting at the University of São Paulo, whose presence and collaboration were fundamental to the success of this meeting.

We have worked really hard in order to prepare a both productive and inspiring meeting. We hope that you have a great time and enjoy 2014 LACEA LAMES!

Kind regards,

LACEA LAMES Organizing Committee
University of São Paulo – 80 years of excellence

Created in 1934, the University of São Paulo is one of the most important institutions of higher learning in Brazil. Its undergraduate program consists of 249 courses, dedicated to all fields of knowledge, distributed in 42 units of learning and research and offered more than 58 thousand students. The graduate program is composed of 239 programs (with 332 Masters degree courses and 309 Ph.D courses).

In order to carry out its activities, USP counts on various campi, distributed in the cities of São Paulo, Ribeirão Preto, Piracicaba, São Carlos, Santos, Pirassununga, Bauru and Lorena, besides units of learning, museums and research centers located outside these spaces and in different municipalities.

USP’s international vocation stems from its foundation, through the union of already existing schools and the relevant role played by foreign professors, especially French, Italian and German, who came to teach at the former School of Philosophy, Sciences and Literature. The later dismemberment of this School resulted in a large number of the university’s schools and institutes.

The new requirements of globalization have accelerated USP’s process of internationalizing its learning and research activities with excellent results. The growing number of professors and students in exchange programs and the institution’s performance in the above-mentioned world rankings show that the University of São Paulo continues on the right path, uniting tradition with innovation to bring about the development of Brazilian and world society.

Features

The contribution from former FEA students to the development of the Brazilian society is proof of the school’s excellence. In the public and private sectors, former FEA students have distinguished themselves, becoming prominent executives in important companies or following an academic career.

In the constant search for innovation and modernization, FEA works with a unique group of PhD professors with international experience and vast research knowledge. These professors help the school become a benchmark in the thorough preparation of students, creating new teaching and research methods through the continuous recycling of its faculty and curricular program.

FEA-USP students have the opportunity to interact with top international teaching institutions in the area. The school has partnerships with reputed institutions across the globe and is constantly seeking new alliances in an effort to stimulate the exchange of ideas and the production of knowledge, ultimately giving more opportunities to its students.

The contribution to the nation’s society is not forgotten: FEA-USP is always trying to strengthen its relationship with society through extension programs which reach all sectors, public and private, with special attention to poor communities.
Latin American and Caribbean Economic Association – LACEA

The Latin American and Caribbean Economic (LACEA) is an international association of economists with common research interests in Latin America and the Caribbean. It was founded in July 1992 to facilitate the exchange of ideas among economists and policymakers. Its purpose is to encourage greater professional interaction among economists concerned with Latin American and Caribbean policy and research problems, without regard to political, ideological or methodological orientation.

Starting from 1996, LACEA has held annual meetings in Medellín, Buenos Aires, Bogotá, Santiago, Rio de Janeiro, Montevideo, Madrid, Puebla, San José Costa Rica, Paris and Mexico. Beginning in 2006, these meetings have been organized jointly with the Latin American Chapter of the Econometric Society (LAMES). LACEA is also part of the Allied Social Sciences Association (ASSA).

LACEA sponsors seven specialized research networks: the Network on Inequality and Poverty (NIP); the Political Economy Group (PEG); the Trade, Integration and Growth Network (TIGN); the Impact Evaluation Network (IEN); the International Finance and Economics Camps Network (IE&F); the Labor Network (LN) and the America Latina Crime and Policy Network (AL CAPONE). Additionally, from 2001 to 2009 LACEA sponsored the Regional Integration Network (RIN). LACEA’s associate networks organize regular meetings and workshops providing space for high quality and specialized discussion of research in the region. Since 2000, LACEA has been publishing its own journal Economia that has recently released its twenty-ninth issue. The journal has consistently published articles from some of the world’s leading economists, as well as from many of today’s rising Latin American economists.

LACEA is generously supported by grants from the Global Development Network and the World Bank’s Development Grant Facility. In addition, the annual meetings and associate networks have been supported by grants from the World Bank, the Inter-American Development Bank, the Development Bank of Latin America - CAF, among others. LACEA allocates funding for its activities through a competitive process based both on quality standards and capacity-building criteria. LACEA’s funding has been used to reach out to minorities and economists of under-represented countries of the region, as well as to bring policy-makers closer to the Association’s activities under GDN’s objective of bridging research and policy.

Since its creation, LACEA has grown to an organization with 500 active members. LACEA members enjoy exclusive benefits: invitations to participate in LACEA’s annual meetings and associate network activities, biannual issues of Economia, access to JSTOR’s Economic and Business Collection, a fortnightly newsletter with information about grant/funding opportunities and academic activities, and Vox.LACEA with information on current research, interviews, debates, teaching materials, as well as reliable data.

More information about LACEA’s history, bylaws, activities, and membership can be found at www.lacea.org.
The Econometric Society

The Econometric Society is the most prestigious learned society in the field of economics. It is an international society for the advancement of economic theory in its relation to statistics and mathematics and operates as a completely disinterested, scientific organization without political, social, financial, or nationalistic bias. The Society is currently organized into six regions: Australasia, Europe and Other Areas, Far East, Latin America, North America, and South and Southeast Asia.

Its main object is to promote studies that aim at a unification of the theoretical-quantitative and empirical quantitative approach to economic problems and that are penetrated by constructive and rigorous thinking similar to that which has come to dominate in the natural sciences.

The Econometric Society was founded in 1930, at the initiative of the Yale economist Irving Fisher (the Society’s first president) and the Norwegian economist Ragnar Frisch, who some forty years later was the first economist (together with Jan Tinbergen) to be awarded the Nobel Prize.

The main activities of the Society are the organization of scientific meetings in six regions of the world (including a World Congress every five years) and the conduct of elections for Fellow of the Econometric Society, an honorary designation highly valued by members of the economics profession. The Society publishes three academic journals, Econometrica, Quantitative Economics (QE), and Theoretical Economics (TE), and a Monograph Series in collaboration with the Cambridge University Press.

The University of Sao Paulo has previously hosted and organized once the Meeting of the Latin American Chapter of the Econometric Society and is proud to do so this year as well.

[40] WB FLAGSHIP: THE RISE OF DEVELOPING ECONOMIES IN THE GLOBAL
ECONOMY AND LATIN AMERICAN DEVELOPMENT ► ROOM E1

This session is sponsored by IDB and World Bank

The global economy is not what it used to be some 15 years ago. Today developing economies account
for large shares of global GDP, international trade and global financial flows. But their rise has been uneven
across industries and types of flows. The panelists will discuss the implications of the rise of developing
economies in global markets for the development prospects of Latin America and the Caribbean.
